Option of flat keyboard

SMART SYSTEMS THAT DO MORE – COST LESS
GELLER ELECTRONIC CASH REGISTER TERMINALS

At the retailing point of sale since 1957

Big system features for the price of a basic ECR

The SX-580 is priced to be used as a simple, stand-alone cash register. From the many options available, you or your dealer can easily select just the 'smart' features that suit the way your business operates.

Alternatively, you can add Geller back office software either now or as your business grows. You can connect your PC directly to the SX-580 in-house if you have one shop, or by modem if you have more than one shop.

Displays:
The 16 digit alphanumeric front and rear displays describe all items by name and give user-friendly prompts to servers to ease and speed service. The rear display can be raised and rotated to the best viewing position.

Drop and Load Silent Printer with Graphic Logo:
The SX-580's hi-tech drop and load printer with separate 57 mm thermal receipt and audit rolls, simplifies and speeds paper roll changes and eliminates the possibility of paper jams. There is no ribbon to replace or fade, so receipts of the same exceptional clarity are produced every time. Your company logo or special design can be printed on each receipt.

Option of Low Cost Scanning:
The SX-580's memory can hold up to 5,000 sales items as Price Look Ups. You can enter sales manually on the keyboard by registering the Price Look Up number. Or, you can scan bar coded items for high-speed sales. A range of low cost scanners is available for the SX-580

Bar Code Learning:
If you come across an unprogrammed item - even in the middle of a sale - 'Price' displays on the screen. After you enter the price and press the department, subsequent sales of the item will scan, showing the price and department name. Bar code names and prices can also be entered by PC.

Solid State Memory for Data Security
You or your dealer can select just the programmable options that suit your business. Your programme and sales data are securely stored in battery-backed RAM memory.

Powerful Management Reporting:
A choice of twelve management reports provides the information you need to control your business. Eight Display Only reports (flash reporting) are also available.

Authorised Sales and Service Dealer

Some of the many important features:
- Server Interrupt (Several Staff can use the SX-580 at the same time) avoiding queue build-up
- Up to 4 scrolling messages display promotions or information to your customers between sales. Messages can change automatically by pre-programmed time.
- 5,000 Price Look Ups
- Stand alone scanning for up to 5,000 items with simple price and product maintenance and bar code learning feature.
- Price Check Feature
- Compulsory Server ID
- Space saving design with option of remote cash drawer
- Training Mode for new staff
- Two RS-232 communication ports for programming the SX-580 by PC and/or linking to a barcode scanner
- Cash Lift Alarm warns when money in drawer reaches a pre-programmed amount
- Drawer Open Alarm
- Age verification feature
- Password Protection for X and Z reports Management control for security sensitive operations
